DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Figures 1-3, claims 1 and 2
- II. Figures 4-6, claims 3-6
- III. Figures 8-9, claims 3-6
- IV. Figures 10-11, claims 3-6
- V. Figures 12-14, claims 3, 4, and 7
- VI. Figures 15-16, claims 3, 4, and 7
- VII. Figures 17-18, claims 3 and 8-10
- VIII. Figure 19, claims 3 and 8-10
- IX. Figures 20-22, claims 3, 11, 12, 14, and 15
- X. Figure 23, claims 3, 11, 12, 14, and 15
- XI. Figures 24-25, claims 3, 11, 12, 14, and 15
- XII. Figures 26-28, claims 3, 11, 12, 14, and 15
- XIII. Figure 29, claims 3 and 11-15
- XIV. Figures 30-31, claims 3, 11, 14, and 15
- XV. Figures 32-33, claims 3, 11, 14, and 15
- XVI. Figure 34, claims 16-18

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election. No claims are generic. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features because each species has features not present in other species.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of

record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
